PROFILE SUMMARY

Computer Science professional with **4+ years of experience** in software development, currently pursuing a master's in computer science with a **focus on Artificial Intelligence and Machine Learning**. Skilled in Deep Learning, Generative AI, and Multimodal Transformers, with hands-on **projects in multilingual LLM evaluation and text-to-image generation**. Proficient in Python, PyTorch, TensorFlow, and Hugging Face, with expertise in benchmarking, model training, and AI-driven application development. Known for bridging software engineering best practices with cutting-edge AI research, and eager to apply technical expertise and creativity to solve impactful real-world problems in AI/ML.

EDUCATION

Julius Maximilians University of Würzburg Master of Science in Computer Science (Informatik) Grade: 2.2 (in German Scale)	Oct 2023 – Mar 2026 (expected) Wuerzburg, Germany
Kalinga Institute of Industrial Technology, Deemed University B. Tech in Computer Science and Engineering Grade: 2.1 (in German Scale)	Jul 2015 – Nov 2019 Bhubaneswar, India

WORK EXPERIENCE

Julius Maximilians University of Würzburg Research Assistant – Developer	June 2024 – Present Wuerzburg, Germany
- Developed interactive scientific visualization applications for complex geometric systems, integrating multiple hardware platforms via OpenXR for cross-platform compatibility and efficient memory management. - Researched multimodal interaction pipelines (gesture recognition, combined input), with focus on system efficiency and responsiveness.	
Mobile Premier League Software Development Engineer I	Nov 2021 – Sept 2023 Bengaluru, India
- Optimized real-time distributed systems for millions of active users, reducing latency and strengthening reliability. - Built internal anomaly-detection frameworks, leveraging behavioural data to improve backend security and fault tolerance. - Led a refactoring initiative with automated debugging tools, cutting user-reported issues by 37%. - Re-architected code for better memory efficiency and modularity across multiple product formats.	
Cosi Games Software Engineer	Feb 2021 – Oct 2021 Bengaluru, India
- Reduced system response latency by 45% through backend optimization and server migration. - Refactored legacy systems, reducing technical debt by 30% while improving long term system stability.	
Zenida Studios Software Developer and Co-Founder	Oct 2018 – Feb 2021 Dehradun, India
- Designed and launched 5+ mobile games featuring intelligent NPC behaviour and adaptive gameplay using heuristic and ML-inspired techniques. - Integrated AI heuristics and third-party SDKs to enhance system functionality and adaptability - Spearheaded cross-functional collaboration to design modular, reusable systems, cutting average development time by 20%.	

Libraries & Frameworks: PyTorch, TensorFlow, Keras, scikit-learn, NumPy, Pandas, Matplotlib, Hugging

AI/ML Expertise: Artificial Intelligence, Machine Learning, Data Science, AI/ML theories & algorithms,

Tools & Platforms: Git (Hub, Lab, Enterprise), Docker, Jupyter Notebook, Google Colab, Hugging Face,

Technologies & Workflows: Object-Oriented Programming (OOP), Modular Software Design, Algorithms &

Professional Competencies: Leadership, Stakeholder Engagement, Problem-Solving, Critical-Analytical

LANGUAGES

Hindi: Fluent, Professional Working Proficiency
